C3 Systems, S.L. C/Alberto Sols, 6 Elche Parque Industrial 03203 - ELCHE (Alicante) Tel.: 966 286 186 • Fax: 965 682 677 • c3systems@c3systems.es • www.c3systems.es • www.seeglass.es

Creating usable space  
with an unimpeded view

[www.seeglass.es](http://www.seeglass.es)

The Sliding-folding system is adaptable to most situations. Ideal for the glazing of balconies, terraces, conservatories, shopping centres, restaurants etc, easily adapting itself and blending in with all adjoining architecture.

High quality systems that create new usable space providing a pleasant ambiance whilst increasing the value of the property.

Offering protection from the elements and at the same time the possibility of turning inside space into outside space in seconds. Make the most of the view from your terrace in a controlled way, whilst dining or just relaxing.

**VISUAL IMPACT**

Non-conflicting with the adjoining architecture, thus respecting the aesthetics of any buildings façade. The system is completely free of vertical profiles. Adapting perfectly to any situation.

**CLEANING AND OPENING**

The interior and the exterior of the glass panes can be easily cleaned from the interior of the property. No more dangerous or strenuous maneuvers required.

**OPERATION**

A system of bearings and highly resistant components which are designed to withstand continuous use. The sliding of the panes is smooth and silent.

**MIDDLE OPENING**

An intermediate opening system for controlled ventilation. Open partially and spread the rest of the panes evenly for comfortable and controlled ventilation

**RING HANDLE**

Ring handle system to facilitate the opening of the door. Enables maneuverability of the door without handling the glass pane.

**LOCKS**

Manual door lock at the foot of the pane permitting manual locking.

**PROFILES**

Expanding top profile offering the possibility of absorbing irregularities in the buildings soffit. Available adjustment of a total of 25mm. 12,5 mm, either side of the central position. The top rail is easily adjusted within the expanding profile, then locked into position.

**EMBEDDED LOWER PROFILE**

Embedded profile for installations where unimpeded access is required, avoiding tripping hazards.

**SAFETY-LOCK**

Security system with child protection with or without anti-theft lock, also allowing simultaneous access from the interior and exterior. Wide range of possibilities.
