Screens Habitat SOL

The **Habitat SOL** screen by C3Systems for roofs and pergolas is a horizontal motorized roll-up acrylic fabric awning. This system, known as a veranda-type awning, is characterized by keeping the fabric taut in any position through its gas piston system with automatic stops. In addition, it is fully retractable into a protective fabric box thanks to a remote control motor. This protection box increases its overall durability.

This awning is designed to protect from the sun, from the intensity of heat and from the reflections that can appear throughout the day. It offers us total protection from the sunlight. Its motorization makes it really easy to open and close, and allows to choose the desired opening position at any time just by pressing a button.

Habitat SOL contributes to saving energy thanks to its regulation of solar radiation. Customize your spaces and live with maximum comfort.

Technical specifications

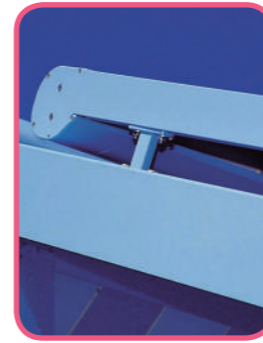

habitat sol®

TECHNICAL DETAILS

Sun protection system

Up to 27.5 m² of area to protect the interior of the room from light and sun. (min. 1 m²).

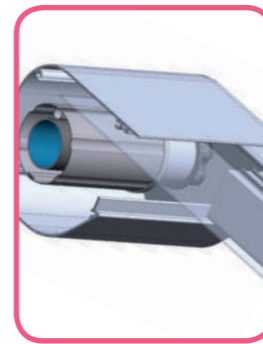

Resistance to wind guaranteed

Thanks to the tests carried out and the approvals obtained by the certification bodies.

Quick and simple installation

The assembly of the awning does not involve construction works and its motorization comes programmed.

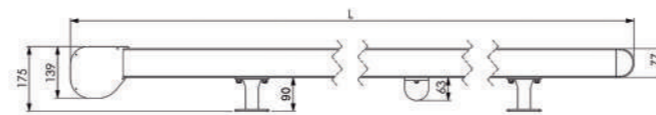

Tension system with pistons

Thanks to the pressure pistons, the fabric remains constantly taut in any position.
