New range of decorative pergolas

Innovative structures with avant-garde design.

Imagine a space where technology and elegance merge to transform your outdoor environment into a natural extension of your lifestyle. This is how the Seesky DECO line was born: decorative structures designed to offer beauty, comfort, and functionality as well. Because each structure isn't just a pergola: it's an invitation to experience the outdoors in a new way.

C3 Systems redefines the way of enjoying outdoor spaces, focusing on innovation, design quality, and harmonious integration with the environment. With an avant-garde architectural vision, three distinct systems are presented—Slats, Interwoven fabric, and Palillería awning—that adapt precisely to any type of project, providing aesthetic and technical solutions for private homes or landscaping projects.

Lightweight and resistant structures

Aluminum Profiles

The aluminum profiles of our structures stand out for their elegant and minimalist design, where the beam screws remain hidden, ensuring a clean and sophisticated finish.

120x60mm beam profile

Wall support

The configuration with wall support allows great flexibility of adaptation according to the available space while maintaining the clean aesthetics of the set.

120x120mm wall support

Floor support

The floor anchoring provides a solid and resistant base to the set, ensuring stability. This solution allows for the installation of independent structures, depending on the project design.

180x120mm screwed floor fixing

Solutions adapted to your space

Seesky DECO structures allow multiple configurations according to the environment and client requirements: Wall-mounted installations, island-type structures, or successions (3, 4, 5,...), either in width or length, each option has been designed to combine strength, aesthetics, and functionality. Here are some illustrative examples:

Successions

Modular arrangement that shares the central pillar between structures.

L-Shaped Successions

Modular arrangement that optimizes space by maximizing the shading capacity.

Square Successions

Modular arrangement designed to cover large spaces by optimizing the use of aluminum.

Perfect balance between comfort and style

Seesky DECO slat offers a unique solution to transform your outdoor space into a place of comfort, perfectly adapting to your needs. With innovative design and high-quality materials, these structures allow you to enjoy maximum sun protection while creating a cool and pleasant environment without sacrificing aesthetics.

Thanks to their adjustable slat system, you can decide the amount of natural light that enters, giving you total control over the shade at all times. Additionally, their easy installation and maintenance make these pergolas ideal for both end customers and installers, ensuring speed and efficiency in each project.

Seesky deco Slat: Private home environment.

Slats orientation

45° slats

With a 45° inclination, they provide a continuous shading effect and more direct sun protection. Additionally, they can be combined with the vertical slat option if the module is divided into different quadrants.

Vertical slats

With a 90° inclination, they provide maximum light entry. Linear elegance that favors natural ventilation.

Slat section

Distance between slats

There are three options depending on the preferred distance between slats:

1 | Dense:
Distance between slats of 120mm

2 | Standard:
Distance between slats of 170mm

3 | Spaced:
Distance between slats of 220mm

Structure quadrants

The Seesky DECO structure allows subdividing the interior into quadrants or sections, achieving greater customization of the space. These divisions adapt to aesthetic or functional criteria such as light passage, accessory installation, or integration with furniture.

Each quadrant operates independently, providing greater versatility when managing natural light in different areas of the same structure. Thus, it is possible to create areas with different levels of shade or openness, depending on the use or time of day.

Quadrants (Divisions in width and length Max. 3 divisions per side).

These are some examples of quadrants. For other configurations, please consult.

Structure in succession with unevenness.

Interwoven fabric

Decorative sun-resistant fabrics

Decorative pergola with fabric screens and imitation wood beams to protect from the sun. Intelligent protection from the sun in any environment.

Interwoven fabric

Seesky DECO interwoven fabric offers a unique solution to transform your outdoor space into a place of comfort, perfectly adapting to your needs. With innovative design and high-quality materials, these structures provide maximum sun protection while creating a fresh and pleasant atmosphere, without sacrificing aesthetics.

Palillería awning

Effective sun protection

In a world where climate and sun exposure can affect the quality of our outdoor spaces, sun protection has become essential. Seesky Palillería awning offers an innovative solution with its aluminum structure and retractable awning, designed to provide optimal solar protection.

Advantages of fabrics

◆ Weather resistance

The technical fabric that withstands temperature changes and remains in good condition in humid environments. UV protection prevents discolouration from the sun.

◆ High durability

Made from technical fabrics such as solution dyed acrylics or PVC coated polyester, they stand the test of time and continuous use.

◆ Easy maintenance

Allows for easy cleaning, ideally with just water and neutral soap, and features dust and dirt repellent finishes to reduce the frequency of maintenance.

◆ Dimensional stability

The fabric retains its shape without warping or buckling, even with age or weather changes, for a neat and professional appearance.

WARRANTIES AND APPROVALS

Seesky deco comes with a 3-year warranty and complies with the quality and safety requirements established by ISO 1090 and CE marking. These certifications reflect C3 Systems, S.L.'s commitment to excellence, strict control in every phase of the manufacturing process, and compliance with European standards.

3 year warranty*

Seesky DECO has a 3-year warranty on all components

**(See document in the client area - B2B).*

Guarantee of manufacturing quality and safety of products from manufacturers in the metal sector, including those of metal structures.

CE Marking

All our systems are approved by an official laboratory and in accordance with the requirements of the European Commission to bear the CE Marking seal. We have all the tests and certificates that comply with this regulation and we have a computer tool that makes it easier for the workshop to obtain this label.

Our new facility incorporates an advanced multi-metal powder coating plant, designed to apply high quality finishes to aluminium profiles and other metal accessories. This system complies with the most demanding international standards, including Qualicoat, Qualicoat Seaside and Qualimarine.

Thanks to a flexible process architecture, this plant allows the surface treatment of different metals through customisable configurations with specific recipes. This versatility not only guarantees an excellent finish, but also expands our production capabilities and opens up new business opportunities.

Why should we use aluminum for the systems of the future?

FOR ITS ENVIRONMENTAL ADVANTAGE

It is the only material that is 100% recyclable and reusable infinitely many times.

It is the only 100% sustainable and is effectively recycled. The high price of its scrap proves it.

The mineral with which it is produced is practically inexhaustible. It is the only one that promotes 100% circular economy.

Slat

Seesky deco Slat is designed to create shaded areas with an attractive visual play of light and shadow, ideal for urban environments or waiting areas.

Interwoven fabric

This option provides a soft and cosy shade. It is designed for outdoor lounging areas where a relaxed and natural aesthetic is a priority, such as resorts, terraces by the sea or chill-out spaces.

Palillería awning

This combination allows you to enjoy open spaces such as hotel terraces or poolside chill-out areas, providing shade and light play-perfect for sunbeds in chill-out pool areas.
