Safety Screen **Seeglass GAP**

Seeglass GAP, in its 2 versions **GAP SAFE** and **GAP WALL**, is the new safety screen system. This new family of products was thought and designed to prevent contagions. It can separate all sort of spaces and it allows to work or enjoy your free time with the peace of mind of not being directly exposed to any external agents than can lead to contagion. When protection is needed the height adjustable panels of the system can be easily lifted and you can keep enjoying your spaces.

Seeglass GAP has been designed to make it as easy to use and flexible as possible. The panels can be easily raised and lowered manually without any effort. This makes it perfect for offices, pharmacies, restaurants, shops etc. Customers can choose the height of the height-adjustable panels and adapt it to any situation in order to be protected and safe at all times.

Made with aluminium, in its standard configuration it comes with 6mm thick safety tempered monolithic glass, in both the fixed lower panel and the upper height-adjustable panel, ensuring greater resistance than plain glass. Whichever configuration is selected, all connectors are made of the highest quality materials.

Uses

HOSPITALS & HEALTH CENTERS

NURSING HOMES

Advantages

1. INSTALLATION TO THE GROUND

Unlike other systems in the market, the possibility of installing the system directly to the ground gives the broadest chances of use: hospitals, restaurants, shops, pharmacies, beer gardens, etc.

2. HEIGHT ADJUSTABLE

The system is easily adjusted manually and without any effort.

3. MADE WITH TEMPERED GLASS

Supplied with 6mm thick tempered glass. Much more resistant and safer compared to standard glass, has greater thermal, impact and chemical erosion resistance.

4. SIMPLE INSTALLATION

The system comes pre-assembled and it can be installed in few easy steps and using common everyday tools.

5. EASILY DETACHABLE

The panels and screens can be detached easily for quicker and hassle-free storage.

6. HIGH RESISTANCE MATERIALS

The materials used to manufacture the system (aluminium, tempered glass, stainless Steel screws) are of prime quality and durability.

7. NEW AND SAFER SPACES

The modules are easily assembled to cover and protect big spaces.

8. COMPOSITION

Simple configuration of the space, thanks to the modular composition.

9. MADE IN SPAIN

All the materials used and all the components are made and assembled in Spain.
