Date, signature and stamp

Very important

1. The indicated measures must be total measures.
2. The ceiling support makes it easier to level the installation and creates a space of 6mm between the ceiling and the box.
3. In case of installing the "Led Light in Box", an external space for the switchboard must be provided.
4. The options marked with the **seesky bio** logo are the ones included as the standard option when the awning is installed in a bioclimatic pergola.
5. The materials marked are NOT PERMANENT STOCK and their deadline may be extended depending on the existing stock when the order arrives.
