Very important

- The indicated measures must be total measures.
- The ceiling support makes it easier to level the installation and creates a space of 6mm between the ceiling and the box.
- In case of installing the "Led Light in Box", an external space for the switchboard must be provided.
- The options marked with the **seesky bio** logo are the ones included as the standard option when the awning is installed in a bioclimatic pergola.
- The materials marked are NOT PERMANENT STOCK and their deadline may be extended depending on the existing stock when the order arrives.

**Installation type**
